PROFESSIONAL SUMMARY

Computer Science graduate from UFT with two years of combined hands-on experience in software development (UFT's Software Factory) and data analysis (Federal Court). Selected for the ELAP leadership exchange program in Canada. Communicative and adaptable profile, with immediate availability for remote or in-person work.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Python, SQL, C, HTML5, CSS3, SCSS.

Frameworks & Libraries: React, Next.js, NestJS, Django, Node.js, Tailwind CSS, Bootstrap, Chart.js, Axios, Angular, Pandas, FastAPI, pytest.

Databases & ORMs: PostgreSQL, MySQL, NeonDB, Prisma ORM, TypeORM, SQLAlchemy.

Testing & Tools: Jest, Vitest, React Testing Library, Git, AWS, Power BI, Figma.

Engineering & Methodologies: RESTful APIs, OOP (Object-Oriented Programming), Design Patterns, Unit Testing, Software Architecture, Scrum, Kanban, microservices architecture.

PROFESSIONAL EXPERIENCE — INTERNSHIPS

Full Stack Development | UFT Software Factory | Mar 2024 – Jan 2025

- I implemented essential new features (invitation modules, REST APIs, filters) for the SAGE system using Python, FastAPI, React with TypeScript, Tailwind CSS, Bootstrap, CSS, and Chart.js. In doing so, I boosted the market value of the development unit's flagship product through the sale of a SAGE license to the State University of Tocantins (UNITINS).

Data Analysis and Business Intelligence | Federal Court – TO | May 2023 – Mar 2024

- I performed data analysis using Python (with Pandas) and React with TypeScript (via the Chart.js library), which assisted managers in the strategic decision-making process for the Federal Court in Tocantins, impacting thousands of people.

EDUCATION AND EXCHANGE PROGRAM

B.S. in Computer Science | Federal University of Tocantins (UFT) | June 2026

- Final Project focused on AI and Data Science: National-scope prediction of SUS no-shows using Supervised Machine Learning models - KDD Workflow - Random Forest, Symbolic Regression, Logistic Regression, and Exploratory Data Analysis (AED).

Emerging Leaders in the Americas Program (ELAP) | Jan 2025 – Apr 2025

- Exchange Program at Canadore College — North Bay, Ontario, Canada.
- Courses: Databases & SQL (55h), Advanced Scripting Ruby and Python (55h).

PROJECTS

[Portfolio](#) (Next.js, NestJS): Personal showcase of development work.

React Applications & Full-Stack: [Apple Store](#) & [Calendar](#) Projects (React), [CRUD Items](#) (Next.js, NestJS), [E-commerce](#) (Django, Bootstrap).

LANGUAGES

Brazilian Portuguese: C2 – fluent/native

English: C2 – fluent – UFT placement test.

Spanish: B1/B2 – intermediate.

CERTIFICATIONS

- React Testing with Jest / Vitest - TypeScript | Udemy, 05h | Jul. 2026;
 - In-depth experience building automated tests for React applications, ranging from rendering simple components to handling dynamic scenarios that simulate user behavior using `userEvent.setup()`. Extensive practice testing custom hooks and state updates with the `act()` function. The training placed a strong emphasis on TypeScript and covered the configuration and use of mocks, spies/test doubles, text matchers, and snapshots. Key highlights included Test-Driven Development (TDD) and realistic API request simulation (network interception) using MSW (Mock Service Worker).
- The Role of DevOps in the Digital Transformation of Public Services | ENAP, 20h | Aug. 2023;
 - A study of DevOps and how it supports the smooth operation of public services.
- Data Manipulation and Analysis with Pandas - Python | Udemy, 6h | Aug. 2026.
 - Review of Data Science and Data Analysis concepts using Pandas.
